SUMMARY

Frontend Web Developer with over 15 years of experience; including new builds, redesigns, maintenance, and custom solutions. Passionate about intuitive and efficient user flows and functionality. Thrives in a collaborative environment.

PROFESSIONAL EXPERIENCE

RYDER | Nov 2019 - Dec 2024
Logistics leader specializing in supply chain solutions

Application Developer III

- Owned complex features and enhancements in a cross-functional team, including Product Owner, Ops, and Quality Assurance
- Worked closely with backend developers to streamline the packing process to update hundreds of identical orders at once, saving both time and money
- Completely rebuilt a role-dependent, dynamic site navigation, improving the responsive design and adding 3rd-party search functionality
- Ported Ruby on Rails pages to a new, decoupled frontend environment for rebuild and redesign, utilizing APIs for data consumption

PERFICIENT DIGITAL | Nov 2015 - Nov 2019
Global digital consultancy transforming enterprise experiences

UI Engineer

- Sole frontend engineer for a large, luxury rental properties client, handling maintenance and enhancements, redesign build-outs, custom interactive solutions, and 3rd-party integrations
- Worked in a staff augmentation role, adapting to various tools and technologies to support diverse clients and teams
- Email template bug fixes and build-outs

IGNITE XDS | May 2014 - Sep 2015
Creative agency specializing in digital marketing solutions

Frontend Developer

- Developed and maintained all dealership and supplemental websites in a local development environment and deployed with Engine Yard or Heroku
- Completed full site development, from PSD slicing to deployment and DNS setup
- Handled WordPress migration from various hosts to WP engine

INTERPOLLS | Jan 2009 - Feb 2014
Innovator in interactive online advertising campaigns

Production Engineer/Manager

- Oversaw and trained new production engineers on the code and production and QA processes
- Created and updated in-house software, allowing for increased productivity and faster turn-around times
- Built new ad units to IAB specs from the ground up upon request from a client or publisher
- Ensured quality and accuracy in the work done by the design and engineering team
