PROFESSIONAL SUMMARY

Frontend Developer with 15+ years of experience building responsive, accessible, and performant web applications across the full development lifecycle. Proven expertise in React, Vue.js, TypeScript, and modern JavaScript, with a strong track record of delivering complex features from story refinement through production deployment. Experienced in REST API integration, component architecture, and cross-browser compatibility. Collaborative team player with mentorship experience, comfortable working within Agile environments alongside Product, Design, and QA teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Ruby

Frameworks & Libraries: React, Vue.js, Tailwind CSS, Ruby on Rails, Bootstrap, jQuery

Tools & Platforms: Git, GitHub, GitHub Copilot, Figma, Adobe Creative Suite, Datadog, LaunchDarkly, Azure DevOps

Practices: Agile/Scrum, REST API Integration, Responsive Design, Web Accessibility (WCAG), Cross-Browser Compatibility, Code Review, Pair Programming, Technical Documentation

PROFESSIONAL EXPERIENCE

Self-Employed (Contract) | *Frontend Developer* — Dec 2024 – Present

- Provided frontend development support for a local agency, contributing to client overflow projects using JavaScript, CSS, and HTML.
- Built and refined personal projects to deepen hands-on experience with modern frontend tooling and best practices such as Vite, React, Tailwind CSS, and Vercel.

Ryder (formerly Whiplash) | *Application Developer III* — Nov 2019 – Dec 2024

- Led end-to-end development and delivery of complex product features, collaborating cross-functionally with Product Owners, Operations, and QA to ensure on-time, high-quality releases.
- Engineered an optimized batch-update warehouse packing solution handling hundreds of simultaneous orders, improving operational efficiency by 95%.
- Rebuilt a dynamic, role-specific navigation system, improving information architecture and responsiveness; integrated third-party search capabilities, reducing search times by 50%.
- Modernized legacy Ruby on Rails pages by migrating to a decoupled Vue.js frontend architecture, leveraging RESTful APIs for seamless data integration and improved maintainability.
- Mentored junior frontend developers through technical guidance, code reviews, and pair programming sessions to accelerate skill development in modern web technologies.

Perficient Digital | *UI Engineer* — Nov 2015 – Nov 2019

- Served as sole frontend engineer for a luxury rental property client, delivering full-cycle maintenance, redesigns, and custom interactive solutions including HTML5 video, slideshows, and Matterport virtual tours using a JavaScript, HTML5, Bootstrap, and .NET/Razor stack.
- Delivered high-quality, responsive UIs for diverse clients in a staff augmentation capacity, rapidly adapting to new tools and frameworks including React.js and Adobe Experience Manager (AEM).
- Built, tested, and optimized responsive HTML email templates ensuring cross-client and cross-device compatibility.
- Collaborated closely with design, product, and client stakeholders to ensure design fidelity, timeline adherence, and client satisfaction.

Ignite XDS | *Frontend Developer* May 2014 – Sep 2015

- Built and maintained dealership websites using a proprietary Rails CMS deployed on Heroku, managing efficient deployment pipelines and local development environments.
- Executed full-cycle website creation, transforming PSD design files into fully functional, pixel-perfect, responsive websites with optimized performance.
- Managed large-scale WordPress migrations to WP Engine, ensuring minimal downtime and full data integrity.

Interpolls | *Production Engineer / Manager* Jan 2009 – Feb 2014

- Developed in-house software tools to streamline production workflows, optimizing specific task pipelines by 90% and significantly reducing overall turnaround times.
- Produced custom interactive ad units adhering to IAB standards, tailored to client and publisher specifications.
- Trained and mentored new production engineers on production processes, QA standards, and internal tooling.
- Led quality assurance efforts ensuring all designs and code met rigorous accuracy and performance benchmarks.

EDUCATION & CERTIFICATIONS

Purdue University | *Professional Certificate — Cybersecurity*

Comprehensive cybersecurity program covering network defense, ethical hacking, risk assessment, incident response, and hands-on labs using tools including Wireshark, Metasploit, and Kali Linux.

Schoolcraft Community College | *Computer Graphics Technology (Coursework)*

Frontend web development and digital media production coursework integrating coding, layout design, and creative software tools.
